

Green Tourism

' Small things can make a big difference '

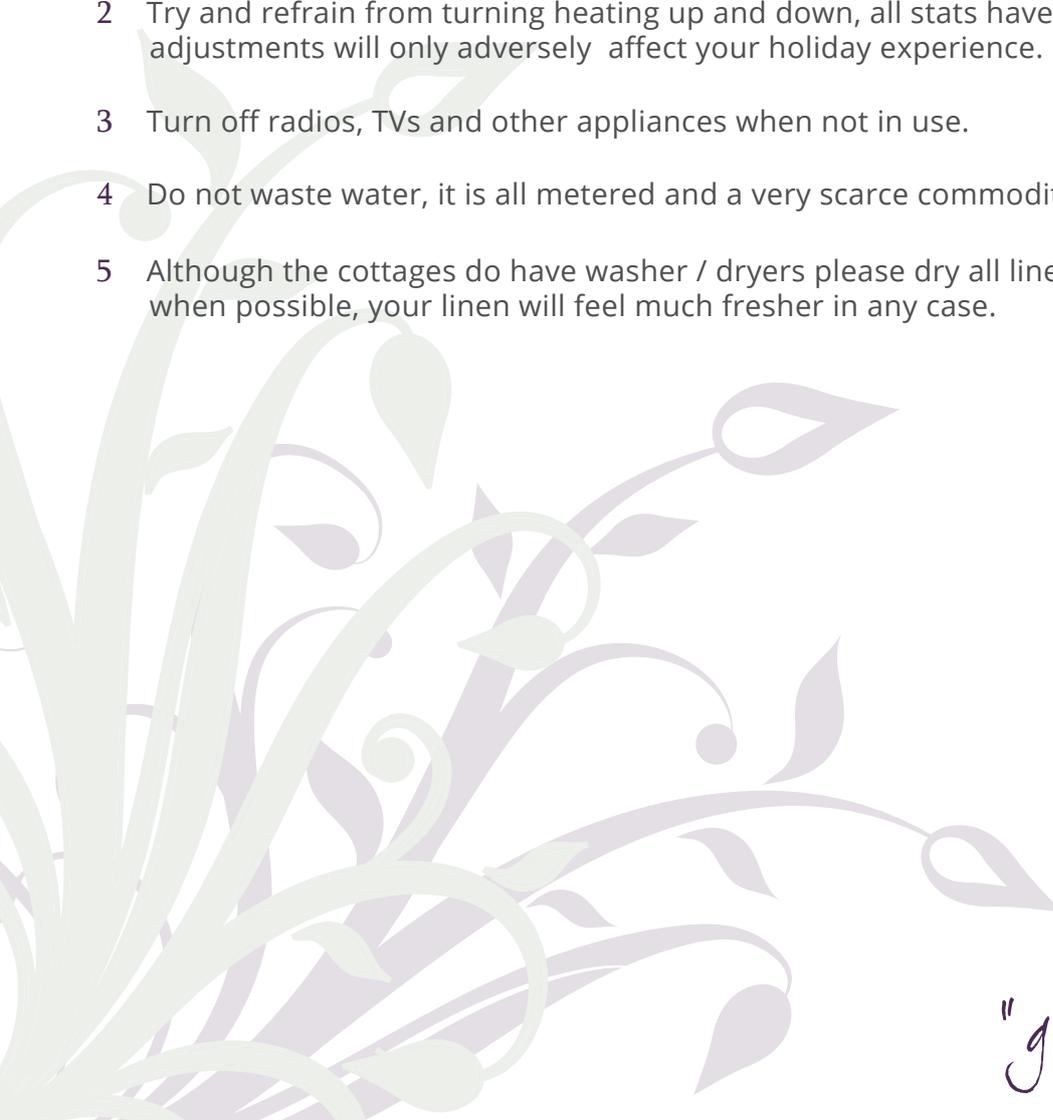

Environmental issues are very close to our heart and we are proudly passionate about them. We try our very best to reduce our environmental footprint on our planet.

During the last 20 years we have planted over 6000 native trees, creating new exciting woodlands, important habitat for native wildlife, bird nesting areas, wildlife corridors as well as a small wetland.

Proud to have attained the Green Dragon Environmental Standard between 2006 and 2010 before the demise of the scheme.

All we ask is that you try your very best to follow some of the suggestions below.

- 1 Please turn off all lights when not in use, although we are striving to get all lighting 'low energy led', still pays to turn them off.
- 2 Try and refrain from turning heating up and down, all stats have been programmed and any adjustments will only adversely affect your holiday experience.
- 3 Turn off radios, TVs and other appliances when not in use.
- 4 Do not waste water, it is all metered and a very scarce commodity in today's world climate.
- 5 Although the cottages do have washer / dryers please dry all linen on the clothes lines provided when possible, your linen will feel much fresher in any case.

Waste Management

At Rhosydd Bach we are very passionate about environmental issues. We can all do small little things that help us to improve the environment that we all depend for our lives.

One of the simplest and most efficient things is recycling.

Our recycling station is at the far end of the yard, in the old pig sties.

Please separate waste into.

- 1 Paper / cardboard.
- 2 Plastic (bottles, bags, wrappers ect.).
- 3 Tins and cans (steel and aluminium), tin foil and foil wrappers.
- 4 Glassware's (bottles, jars).
- 5 Bread, cakes and salad greens.

Why not take a walk and feed the ducks with your 'treats', if you prefer, all the above can be placed in the container marked 'bread' (for the ducks & chickens). We will share them for you.

6 Composting.

All compostable material can be placed in the brown container on the right hand side of the recycling station marked (green waste), it shall be emptied when necessary.

What to compost? Fruit and vegetable peels/rinds, vegetable waste (raw), tea bags, coffee grounds, eggshells and similar materials.

What not to compost? Avoid composting meat scraps, fatty food wastes, milk products, and bones, all cooked food waste - these materials are very attractive to pests.

All other wastes should be put into the black bin liners. They will be transported to the council waste services and in turn will go into landfill.

If we can all cut down our waste by even a half, that's half the amount of rubbish that we have to bury every year, creating problems for the future generations.

We appreciate your co-operation regarding this important issue.
